WCOE AY 2020-2021 Initial Programs Employment Data

The West College of Education (WCOE) annually requests a database from the Texas Education Agency (TEA) which provides employer information for MSU completers employed in the state of Texas. Using the data provided for academic year 2020-2021, the WCOE compared that data with its list of completers for the prior year to determine the number of completers that were employed in the state of Texas during the 2020-2021 academic year. Of the 87 completers, 28 were either not employed or not employed in the state of Texas. Thus, 68% of completers became employed within a year of finishing the program. Completers were employed in 27 different districts throughout Texas with the majority employed in the Wichita Falls District.

District Name n =59	Count	Percent
Andrews ISD	1	2%
Bowie ISD	1	2%
Burkburnett ISD	3	5%
