Radiologic Sciences

Change of Course Description and Change of Lecture/Lab Hours, effective Fall 2019

RADS 3513. Physics and Equipment in Medical Imaging

Description: This course discusses Newtonian and radiographic physics, x-ray circuitry and tube operation, and x-ray production and interactions along with an introduction to computed tomography. **Both lecture and laboratory experimentation to explore these principles.**

Lecture **and Lab** ~~3(3-0)~~ **3(2-2)**

Robert D. and Carol Gunn College of Health Sciences (Graduate)

Criminal Justice

New Course Addition, effective fall 2019

CRJU 5303. Cybercrime

Description: this course explores computer related crime in cyber space now and in the past. Theoretical and practical issues in personal and work related scenarios are studied. Methods of investigation by computer forensic professionals are considered and techniques for security and safety analyzed.

Lecture 3(3-0)

CRJU 5423. Forensic Psychology

Description: An examination of the roles and responsibilities of mental health professionals within the justice system. This will include credential preparation and voir dire, state licensing board regulations, negotiating potential ethical challenges as well as limits of privilege and confidentiality. Students will also survey major topics in regard to experimental forensics psychology, such as police psychology and interrogation; jury selection and decision making; and eyewitness testimony and false memories.

Lecture 3(3-0)

CRJU 5433. Correctional Classification and Case Management

Description: Students will develop an evaluative study of a classification and/or case management system in an assigned jail facility, prison facility, or community-based program. Students will develop their own classification or case management system for a specific offender group using evidence-based practices identified through their own individual research.

Lecture 3(3-0)

CRJU 5443. Multicultural Issues in Criminal Justice

Description: An overview of the impact that diversity and multiculturalism has upon criminal justice agencies. Issues related to human resources, EEO considerations, discrimination within the agency setting, Civil Rights violations among employees, Civil Rights violations committed by practitioners against citizens and/or offenders, are of interest. The impact of the international community on these issues is highlighted within this course.

Lecture 3(3-0)

CRJU 5453. Victimology

Description: An examination of criminal victimization in the United States and globally via an overviews of current theory, research, and trends within the context of specific victimization types. This course will assess specific crime types, the impact of crime on victims and society, the role of victims within the criminal justice system, specific remedies, and victim rights and services.

Lecture 3(3-0)

CRJU 5463. Specialized Offender Typologies

Description: An advanced course on offender typologies to include offenders with anti-social personality disorder, psychopathic offers, adult and juvenile sex offers, offenders who have murdered, as well as hardcore gang members. Issues pertaining to risk predication and assessment for each group is discussed. The means by which treatment is

implemented is discussed, as are security concerns for each offender group. Etiology and theoretical aspects of causation are intermixed throughout this course.

Lecture 3(3-0)

CRJU 5473. Correctional Counseling

Description: An advanced course on developing knowledge of the techniques, theories, and research associated with providing treatment services to criminal offenders. Detailed examination of case management principles, assessment, diagnosis, treatment, and follow up/after care for offenders in both the institutional and community-based setting is provided.

Lecture 3(3-0)

CRJU 5483. Substance Abuse Treatment

Description: Provides and overview of various American Society of Addiction Medicine (ASAM) criteria utilized in substance abuse treatment. Students will be exposed to instruments and techniques of assessing drug and alcohol dependence, as well as the diagnosis, placement and referral of drug abusers. Students will be required to know and apply the 12 core functions of treatment to a case study. Additional emphasis onco-occurring disorders is provided.

Lecture 3(3-0)

Respectfully submitted,

Deb Schulte

Assistant to the Provost and Vice President for Academic Affairs
