## **DCOBA Graduate General Learning Goal #3**:

Our students will produce creative responses to business situations.

<u>Objective:</u> Our graduates will demonstrate the capability to critically analyze business situations and develop creative solutions to opportunities and problems.

| Student Name: |  |
|---------------|--|
|---------------|--|

| Rubric Item   | Exceeds<br>Expectation<br>(3) | Meets<br>Expectation<br>(2) | Not Meet<br>Expectation<br>(1) | N/A |
|---|-------------------------------|-----------------------------|--------------------------------|-----|
| Solution Develo   | pment                         |                             |                                |     |
| Student identifies multiple distinct solutions.                           |                               |                             |                                |     |
| Proposed solutions are appropriate.                                       |                               |                             |                                |     |
| Student collects the specific data needed to solve the problem.           |                               |                             |                                |     |
| Projects Outc   | omes                          |                             |                                |     |
| Student demonstrates coherent thought processes.                          |                               |                             |                                |     |
| Student projects multiple outcomes associated with identified solutions.  |                               |                             |                                |     |
| Thorough Ana  | lysis                         |                             |                                |     |
| Student gathers and examines all inputs.                                  |                               |                             |                                |     |
| Student correctly identifies the root cause(s) of the problem.            |                               |                             |                                |     |
| Solutions are Broa  | ad-based                      |                             |                                |     |
| Student develops business based solutions.                                |                               |                             |                                |     |
| Evaluates Proposed  | Solutions                     |                             |                                |     |
| Student identifies appropriate criteria to evaluate proposed solution(s). |                               |                             |                                |     |
| Student selects the most promising solution.                              |                               |                             |                                |     |
