Course Description
This course introduces the student to some basic skills for viewing, analyzing, and writing about visual representations and objects from material and popular culture. We will examine the essential materials and techniques of art making and investigate aesthetic and cultural production in various times and cultures throughout the world. The course demonstrates how the artist’s time, culture, and political and social environments shape art production and how art communicates multiple messages. Students will learn to conduct a formal analysis of an art object and to formulate interpretive strategies. The course emphasizes the direct experience of art.

Course Requirements
- Students will produce two 3-page reaction papers responding to their attendance and participation in exhibitions at the School of Visual Arts or other venues described in the course outline. These papers count as part of the student’s participation grade.
- Students will take four multiple-choice exams on assigned material.
- VIP Assignment: Throughout the course, students will work in small groups to produce a presentation on an image of their choosing. Students will give a formal 15-minute oral and visual presentation of analysis and interpretation findings in the final weeks of the course. Students will use PowerPoint or similar software programs to present their work and produce a 3-page written summary documenting their findings.
