

Enter Grades

If you decide that you don't want to associate activities to the gradebook and you would rather grade 'manually,' that is also an option.

You will still create grade categories and items for a functioning gradebook, you will just skip the associating step in the settings of any activity.

1. Once you have gone through the activities and have collected your grades, you can navigate to the Gradebook by clicking Progress in the navbar and selecting Gradebook.
2. Select "Switch to Spreadsheet View."

3. This brings up the grade items in the Gradebook with boxes that you can directly enter the grade into. When you are done adding your grades, click Save and Switch to Standard View.

The video [here](#) shows this process in action.

Note: If you use this method, auto-graded tests will not populate in the Gradebook automatically. They have to be associated with a Grade Item. You can gather the auto grades and manually populate them in the Gradebook if you prefer this method.
