

# Creating a Calendar Event

## Why Do I Need This Workflow?

The Calendar tool is a great way to help your learners keep track of their course work. Calendar events can be built all at once at the start of your course and released by date, or instructors/ course facilitators can create calendar events as needed throughout a course. This workflow takes you through the steps for creating a calendar event.

## How: Workflow Steps

1. Select **Edit Course** in the navbar.
2. Select the **Calendar** tool.

## Create Event

● Zack Sandbox

Title

Enter Event Title

Description

5. Do one of the following:
- If you've associated course content with the event and want to use a custom name for the event, select the **Use Custom Name** check box. Enter a name for your event.

Title

Use custom name

- If you have not associated course content with the event, enter a name for your event.

Title

6. Select **Create**.

**Check for Success:** If you can see the event you created appear on the **Calendar**, you have completed this workflow successfully.
