

Quiz Accommodations

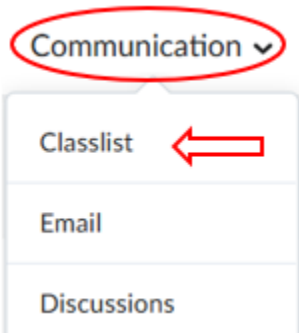

Why Do I Need This Workflow?

If a student needs extra time on tests, you can use the **Accommodations** feature in D2L. This allows you to apply extended time across all quizzes in the course without setting special access for each one individually.

Workflow Steps:

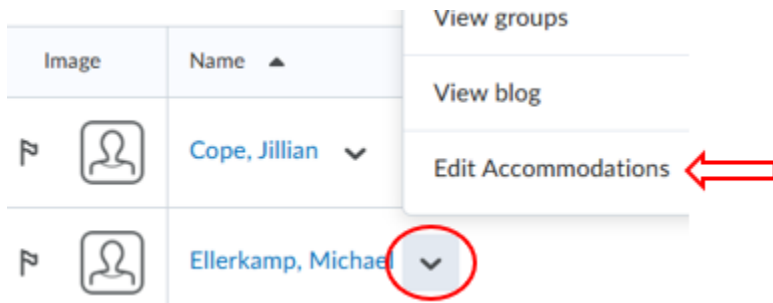

Step one:

From your course homepage, click **Communication**, then select **Classlist**.

Step two:

Click the drop-down arrow next to the name of the student who needs the special access. Then select **Accommodations**.

Step three:

You can provide additional time based on the student's needs by setting either a fixed amount of extra time or a multiplier based on the test length. You can also allow the student to right-click during the test.

Click **Save** when finished. This accommodation will apply to all tests in the course for that student.
