

# Editing a Test Question

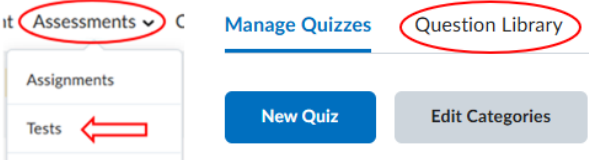

## Why Do I Need This Workflow?

There may be times when you need to edit a question in the Question Library—such as updating the text, point value, or correct answer. In this workflow, you will edit a question so the changes apply both in the Question Library and in your current tests.

## Workflow Steps:

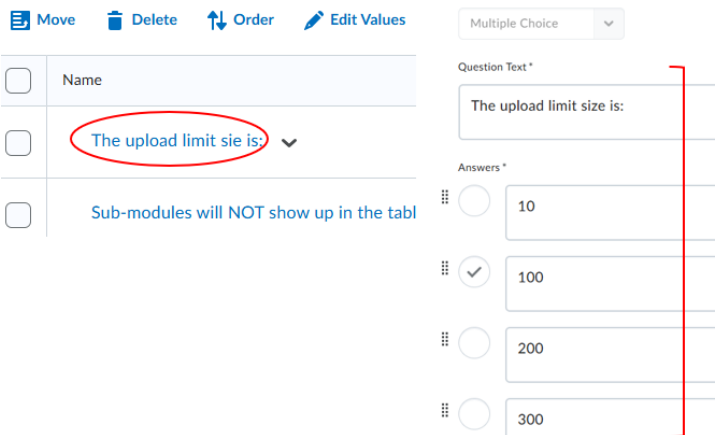

### Step one:

Click **Assessments** in the navbar and then select **Tests**. Once in the test tool, select the **Question Library** tab.

### Step two:

Edit your question: you can change the text, the correct answer, or the points.

### Step three:

Select **Save**.
