MSU Texas, through its Office of Residence Life & Housing provides residential services to its on campus student population. The Office of Residence Life & Housing believes there is a need for rental laundry services in the residence halls & one apartment complex. Currently, the University pays $36.60 per machine/per month and students have access to “vend free” laundry with laundry rates built into the room rental agreement. Students also
have access to a laundry app, allowing them to view open machines from their phones. The University desires to continue providing “run free” laundry with access to technology.

II. SCOPE:

Provide Laundry Vending Services. MSU Texas is looking to enter into a contract with a firm that can include equipment, ongoing maintenance of the equipment, marketing, management, and customer service.

The purpose of this solicitation is to acquire services complying with the enclosed description and/or specifications and conditions. All proposals should be complete and carefully worded and should convey all of the information requested in order to be considered responsive. If the proposal fails to conform to the essential requirements of the RFP, the University alone will be the judge as to whether that variance is significant enough to consider the proposal non-responsive and therefore not considered for award.

Contract Period: The agreement resulting from this RFP is to be a five (5) year agreement, for the period of July 1, 2019 (projected) and terminating on July 31, 2024 with pricing held firm through the entire five (5) year term. If the successful bidder has satisfactory service and can negotiate acceptable pricing with the University, the agreement may be renewed for an additional two (2) years.

Site Visit: To help prepare their proposal, potential partners will be permitted to visit the laundry facilities on campus on **March 18, 2019 at 10:00 AM**. Contact Kristi Schulte @ kristi.schulte@msutexas.edu to confirm that a representative will be on campus to participate in the site visit. This will be the only time Contractors will be permitted to conduct a tour of the laundry facilities.

The chosen firm’s responsibilities shall include, yet not be limited to the following:

1. Provide commercial grade, high efficiency equipment and possess an Energy Star rating as set by the US Department of Energy. Preference will be given to top load washers. Washers shall have at least three wash cycles (i.e. regular, perma-press and delicate) selections.

2. Laundry equipment shall be of adequate size, capacity and proven efficiency for the intended use. Laundry equipment shall be matching (same color and type) at all locations and, where feasible, shall be the same height to give uniformity of appearance.

3. Each laundry room must have at least one washing and one drying unit that is ADA compliant. Such machines shall have all controls convenient for use by people in wheelchairs.

4. The University strongly prefers a company with a non-commission laundry program (vend free programmed machines) whereas the chosen firm shall the invoice Midwestern State University
Office of Residence Life & Housing monthly for rental of washer & dryers; the University will not be utilizing coins, tokens, or ID card readers to start the machine.

5. All washers and dryers remain property of the vendor.

6. The University may require replacement of any machines which have a history of malfunction and may also require the installation of machines in areas not specified at the onset of any agreement issued as a result of the RFP. In either case, all such actions requested by the University will be accomplished by the vendor within thirty (30) working days after the receipt of notification. “History of malfunction” is typically determined by on-going discussions with the University and the successful bidders. RFP responses should contain a statement regarding how the successful bidder proposes to determine “history of malfunction.”

7. Washers and dryers will be installed by the vendor in conformity with all federal, state and local building, utility and health codes, and all other applicable laws/regulations. Natural gas (if used and where available), electrical, sewage, and hot and cold water utility service shall be provided by the University at no charge to the vendor.

8. In the event the successful proposer is not the current vendor, the successful proposer must work with the current vendor at Midwestern State University to provide a mutually agreed upon timeline for the transition period of new equipment, in all locations, with little or no interruption in service to the University.

9. The vendor shall have the right to enter on the premises of the University at all reasonable times for the purpose of servicing and inspecting the machines and for removal of the machines so as to keep them in good working order.

10. The vendor shall respond to malfunction reports within twenty-four (24) to forty-eight (48) hours from the time reported except weekends and holidays. The vendor shall keep a maintenance report log (by machine) to reflect at a minimum (1) the date and time a maintenance request was received, (2) the date and time the required maintenance was performed and (3) a description of the maintenance completed. The vendor shall provide the maintenance report log or copy thereof to the University, in electronic format, every month and upon request.

The University expects that an appropriate number of fully trained service personnel/staff will be available to support the vendor’s proposal. Machines are to be checked (at a minimum) each week the University is open to ensure condition at all times and shall clean up after themselves after any work is performed on the washers or dryers.

11. The vendor shall propose and adhere to a preventative maintenance schedule for all washers and dryers that meet the manufacturer’s minimum requirements for sufficient ventilation of dryers and
sufficient lubrication of washers and dryers. The vendor shall propose and adhere to a replacement cycle for all machines either based on number of uses or number of years. Both a preventative maintenance schedule and replacement of machines schedule must be part of the proposal. Preventative maintenance schedule should include a schedule for cleaning of all dryer vents.

12. The University assumes responsibility for the maintenance of utility services/lines used by the vendor and furnished by the University on university property, for the exterior of all buildings occupied by the vendor and for the cleaning of the public areas occupied by the vendor.

13. During the term of the agreement, the vendor and their designated representatives will be both responsible to and accountable to the Director of Residence Life & Housing and his/her designee. The vendor shall not take any directions that affect any contractual obligations from any other agents of the University except to respond to service calls.

14. The University assumes no responsibility for lost, damaged, or stolen articles or for any vandalism or damage to equipment of the vendor. However, the University agrees to take such measures as may be practical and reasonably required to protect the washers and dryers against loss or damage and will assist in every way possible to apprehend individuals who have committed acts of destruction, theft, or fraud involving the vendor’s machines and occurring on University property.

15. The vendor will provide the necessary operating instructions for all washer and dryers installed. The instructions must be clear and concise and be clearly posted in all laundry facilities. The University will provide appropriate locations for the posting of the instructions.

16. The vendor will provide users at each laundry facility a local or toll free telephone number (at a minimum) where information as to malfunction reports for machines and service quality comments may be reported. Instructions for reporting malfunctions must be clear and concise and clearly posted in all laundry facilities. Information about how the work order process is handled should be clearly outlined in the response to the RFP.

17. The vendor shall be responsible for any refunds necessary for clothing damaged as a result of faulty machine operation. The vendor shall provide written procedures for handling all claims of damage related to machine malfunctions. The vendor shall respond to the claimant within 10 working days of the claim, even if no cash consideration is given.

18. It is the responsibility of the vendor to dispose of all wastes and rubbish incidental to the operation of the services described herein and resulting from actions by the Concessionaire or his employees/agents and to do so in closed containers.
19. The University strongly prefers a company that can provide a web-based monitoring system allowing students to monitor the laundry process remotely for laundry rooms located in their specific building. This technology should permit students to 1) monitor machine availability from their computer or phone via private secure web site available only through the school portal; 2) receive notification of when machines become available or when laundry is completed via email or text message; 3) view machine’s usage history over the previous two week period.
